

Curriculum Vitae for Tim Herrett

Overview

Tim Herrett has been a wellsite/operations and projects geologist for 40 years specialising in formation pressure/wellbore stability evaluation, well data management, software development, coring and sample evaluation. I have also participated in independent formation pressure reviews for a number of oil companies.

Over the last 25 years he has been writing and presenting industry training courses worldwide. He has lectured part time in wellsite/operations geology, pore pressure evaluation and wellsite data management on the Petroleum Geoscience Masters Degrees at the universities of Manchester and Derby in the UK for 20 years.

Work Objectives

To obtain interesting employment which makes full use of my key strengths and technical abilities

Career Summary

Tim Herrett Ltd (2000-Present)

Formed Tim Herrett Ltd to undertake advanced office and wellsite based consultancy work, well data management advisor, technical manual writing, bespoke training courses.

Wrote and presented wellsite/operations geology, formation pressure evaluation/wellbore stability and HTHP courses to the industry.

Wrote and presented courses for BP's Accelerated Development Program for Operations Geology (2010 – present) and is lead facilitator.

Worked on independent formation pressure/wellbore stability reviews for a number of oil companies (e.g. BP, Dana, DEA Wintershall and BG).

Worked as senior consultant wellsite geologist providing formation pressure evaluation support for BP on rank wildcats wells in Brazil and Turkey, Black Sea. Also on the Satis xHTHP discovery wells for BP in Egypt (Nile Delta). Performed similar services for Gaz de France also in Egypt.

Provided operations and wellsite support on deep HTHP well in Norway for ExxonMobil. Wrote bridging documentation for Wellsite and Operations Geology Manuals for NPD compliance. Provided formation pressure prediction and evaluation services on HTHP well.

Worked on and partly wrote Abnormal Pressure Technology Manual for ExxonMobil in Houston

Wrote Operations and Wellsite Geology Procedures manual for ExxonMobil Exploration, Development and Production companies. Designed and wrote training aids for internal ExxonMobil courses.

Worked in ExxonMobil regional/database team collating and quality controlling ExxonMobil and vendor pressure data from Gulf Coast and GOM wells. Recommended and designed Oracle database table designs for storage of data. Involved with setting up processes for data management of pressure data.

Part time lecturer on MSc courses in Petroleum Geoscience at the Universities of Manchester and Derby, UK.

Designed and developed formation pressure evaluation software (Blaise) and other sample description software (WinHippo) for The Trent Rose GeoSoftware Company.

Cambrian Consultants Ltd (1987-2000)

Technical Director Cambrian with responsibilities for Training, Computing and Software Products. Also worked on contract as wellsite/operations geologist and formation pressure evaluation consultant for Mobil, Deminex, Amerada Hess and Fina

Developed log drawing software (Pierre), 'E-Solutions' (HTML/Windows Help based reporting and knowledge bases) for Cambrian. Wrote and presented courses for Cambrian in wellsite and operations geology, formation pressure evaluation and introduction to petroleum geology. Courses presented to companies worldwide.

Performed a number of pre-well, regional formation pressure studies for Mobil Norway. Carried out wellsite and operations support roles on subsequent wells. Cambrian Consultants

Wrote wellsite and operations geology and formation pressure manuals for Mobil Norway. Created operations geology intranet site for Mobil Norway.

Set up final well reporting and composite log drawing systems for Mobil in Dallas, Texas.

Exploration Logging (1978-1987)

Started as mudlogger but quickly progressed to formation pressure evaluation specialist and then wellsite, operations and development geologist in Egypt and Norway. Worked on Statfjord platforms and discovery wells offshore mid Norway. Involved in training of new hires and client personnel
